Flood Forecasting Division Lahore

No. A-09/2025

Government of Pakistan

Ministry of Defence (Defence Division)

Pakistan Meteorological Department

Dated: 25-08-2025

Time: 1630 Hrs. PST

SIGNIFICANT FLOOD WARNING **for River Chenab & Ravi**

1. Under the influence of a **Well-Marked Monsoon Low** over north Rajasthan in synchronization with a westerly wave over Kashmir and adjoining areas, moderate rainfall has commenced over the upper catchments of Eastern Rivers.
2. According to the latest Hydrometeorological conditions, the intensity of rainfall is likely to increase significantly. Consequently, the flows in the **River Chenab at Marala, Khanki, and Qadir Abad**, along with the nullahs and tributaries of the Chenab and Ravi, may rise **High to Very High Flood Levels** during next 48 hours.
3. The flood intensity in the River Ravi entirely depends on the releases from Madhupur Barrage in India. However, due to **High to Very High Rainfall** downstream of Madhupur Barrage and in the catchments of the nullahs of River Ravi, **Medium to High Flood** conditions may develop in the river.
4. Due to intermittent **High to Very High** rainfall, **Urban Flooding** is expected in **Lahore, Gujranwala and Gujrat divisions** during the next 48 hours.
5. It is further informed that the Indian reservoirs on the Ravi and Sutlej are already at danger level.
6. All concerned authorities are advised to take necessary measures to avoid any untoward situation during the forecast period.
